Celebrate with us ten years of the Delaware Humanities Literature and Medicine program, honoring Bayhealth with the Joseph P. del Tufo Humanities Award.

**Keynote by Dr. Danielle Ofri, one of the foremost experts on the doctor-patient relationship.**

Despite modern medicine’s infatuation with high-tech gadgetry, the single most powerful diagnostic tool in the medical kit is the doctor-patient conversation. However, *What Patients Say, What Doctors Hear* are often two vastly different things. This lecture examines whether refocusing the caregiver-patient conversation can lead to better health outcomes.

Available to borrow at the Bayhealth Library.

Tickets ($35) include the lecture, dinner buffet, and book signing.
